ABOUT ME

I am a graduate of Electrical Electronics Engineering with a growing specialization in React development and a deep passion for building practical, elegant, and high-performance web solutions. My engineering background has sharpened my analytical thinking and problem-solving abilities, which I now apply to modern web development challenges.

Through self-directed learning and hands-on project work, I've developed advanced proficiency in React.js and Next.js, alongside solid experience in Jekyll and static site generation.

I excel at crafting dynamic, accessible, and scalable front-end applications with React, using modern hooks, component design patterns, and performance optimization techniques.

My work often blends technical precision with design sensitivity, enabling me to deliver interfaces that are both functional and visually refined. With experience spanning open-source contributions, client projects, and interdisciplinary collaboration, I thrive in environments that demand creativity, efficiency, and attention to detail.

I'm driven by the challenge of turning ideas into impactful digital tools. My aim is to combine my engineering mindset with evolving tech skills to solve real-world problems, drive innovation, and contribute to teams focused on building the future of the web.

WORK EXPERIENCE

AY Creative Technologies Kano, Nigeria

Senior Frontend React Developer

07/05/2025 – Current

At AY Creative Technologies, I work as a **Frontend Developer**, building responsive and high-performance web applications using **React.js and NEXTJS**. My role involves creating interactive user interfaces, collaborating with designers and backend developers, and ensuring seamless user experiences across devices.

Key Responsibilities:

- Developed modern web interfaces using **React**, **JavaScript (ES6+)**, and **V ite** for optimized performance.
- Styled applications with **Tailwind CSS**, **Bootstrap**, **Material UI**, and **Ant Design**, ensuring responsive and mobile-friendly layouts.
- Deployed applications using **Netlify, Vercel and Render**, managed version control with **Git** and **GitHub**, and integrated RESTful APIs.
- Translated UI/UX designs into reusable components and ensured cross-browser compatibility and accessibility.
- Maintained clean code practices, conducted code reviews, and collaborated in Agile workflows.

Life with Alacrity California, United States

Business or Sector Information and communication | **Department** Blockchain & Decentralized Identity Architecture | **Email** ChristopherA@LifeWithAlacrity.com | **Website** https://www.lifewithalacrity.com

Link https://github.com/lifewithalacrity/www.LifeWithAlacrity.com

Frontend Developer

15/09/2023 – Current

- Redesign of Website
- Data Entry

- Development of Website
- Fixing errors in Hosting from github

Sport Tech West Las Vegas, United States

Business or Sector Other service activities | **Department** Sports | **Email** rashadlwest@gmail.com | **Website** http://sportstechwest.com

Link https://github.com/rashadwest/Sportstechwest

Web developer

28/07/2024 – Current

In Sports Tech West, I am in charge of:

1. Adding new features to the website
2. Adding contents to their website
3. Posting contents on their social media handles(Social Media Manager).
4. Editing contents to meet up with SEO rules, so as to increase traffic

Master Eye Security Services Limited Jos Plateau, Nigeria

Web programmer

23/01/2023 – Current

In Master Eye Security Services Limited, I am in charge of:

1. Developing their website.
2. Adding new features to increase users interactions like add comments using disqus.
3. Managing their social media pages like Tiktok, Facebook and Instagram.

Coding for kids Remote, Nigeria

Coding Instructor

01/12/2025 – Current

I'm responsible for tutoring children from the age of 8-14 HTML, CSS, and Javascript

EDUCATION AND TRAINING

19/11/2017 – 28/10/2024 Bauchi, Nigeria

B.Eng in Electrical Electronics Engineering Abubakar Tafawa Balewa University

Address Along, Kano Rd, Bauchi, Bauchi, Nigeria | **Website** https://atbu.edu.ng/ | **Field of study** Electricity and energy , Electronics and automation | **Final grade** Second Class Upper

23/07/2023 – 23/08/2023 Carlifornia, United States

Introduction to Front-End Development Coursera - Meta

15/08/2015 – 31/08/2016 Jos, Nigeria

Satellite Installation Home of Space and Renewable Technology

LANGUAGE SKILLS

MOTHER TONGUE(S): English

Other language(s):

Hausa

Listening C1
Spoken production B1
Reading B1
Spoken interaction B2
Writing B1

French

Listening A2
Spoken production B1
Reading A2
Spoken interaction A2
Writing A1

Levels: A1 and A2: Basic user; B1 and B2: Independent user; C1 and C2: Proficient user

SKILLS

Microsoft Office package: Microsoft Word, Excel, PowerPoint, Access | Google meet, Microsoft powerpoint | implement front-end website design | Experience with PHP, SQL, HTML, CSS, JavaScript | Web Technologies Fundamentals - HTML, CSS | Headless Website: Gatsby, Nuxt, Jekyll, 11ty | Web development (JS frontend, Java Servlets and MySQL backend) | Parse and RESTful backend APIs integration, JSON parsing | Video Conferencing (Zoom, Teams, Skype, Webex) - Advanced | Virtual Assistance | Familiar with Unit, e2e, Integration, Coverage, and Functional testing | Java Script Framework

PROJECTS

25/05/2024 – 10/10/2024

Design and Construction of Solar Float Lamp for Engineering Complex Block C

This project aimed to design, construct, and test an automatic solar-powered flood lamp system for Block C, Abubakar Tafawa Balewa University, Bauchi, with the primary objective of providing efficient and sustainable lighting.

To achieve this goal, a comprehensive methodology was adopted, involving a thorough analysis of the site's lighting requirements, consideration of factors such as area coverage, brightness levels, and operational hours, and calculations for illumination, lumen, and energy requirements to ensure optimal configuration. The system utilized a 215W solar panel array, 60Ah battery, and microcontroller-controlled automatic lighting mechanism, switching LED lights on/off based on ambient conditions.

Extensive testing yielded promising results, including efficient energy capture, storage, and lighting performance, with a total lumen output of 6232.2 lux. Notably, the system demonstrated an energy efficiency of 22% and reduced energy consumption by 75% compared to traditional floodlights. The findings also revealed that the system's reliability and efficiency were further improved through adjustments to control unit settings and solar panel positioning.

The project's outcomes have significant implications for sustainable development, energy efficiency, and environmental conservation, underscoring the potential for widespread adoption of solar-powered lighting solutions in similar settings. The successful implementation of this system serves as a model for future solar-powered lighting initiatives, promoting sustainable practices and reducing carbon footprint. The strength of this work lies in its innovative approach to harnessing renewable energy, its potential for scalability and replicability, and its contribution to the development of sustainable infrastructure.

Overall, this project demonstrates the feasibility and effectiveness of solar-powered lighting solutions for public spaces, offering numerous benefits, including reduced energy costs, minimized reliance on non-renewable energy sources, and enhanced sustainability.

VOLUNTEERING

21/10/2022 – 21/12/2022 Jos

Physical coding tutor

Here's a more detailed and impactful version of your description:

At CodeJika, I served as a Code Instructor, where I specialized in teaching secondary school students the fundamentals of web development. My role involved guiding students through the process of building functional and aesthetically pleasing websites using a variety of code editors, including Notepad, Notepad++, VS Code, and Sublime Text. I introduced them to essential web development languages such as HTML, CSS, and JavaScript, ensuring they gained a solid foundation in both the theoretical and practical aspects of coding. Through interactive lessons and hands-on projects, I empowered students to create their own web pages, fostering critical thinking, creativity, and problem-solving skills. By the end of the program, many students were confident in their ability to design and develop fully functional websites independently.

15/04/2023 – CURRENT Nigeria

Tech Support Specialist

At Kitron Green Initiatives, I combine my passion for technology with a commitment to excellence in my dual roles as a web developer and tech support specialist. As a web developer, I take pride in designing and maintaining responsive, user-friendly websites that align with the organization's vision. I focus on writing clean, efficient code and creating engaging web platforms that perform seamlessly across devices.

In my role as a tech support specialist, I enjoy solving problems and ensuring smooth operations by diagnosing and resolving technical issues, maintaining IT systems, and empowering team members to utilize technology effectively. By merging creativity, technical expertise, and a proactive approach, I contribute to the success and growth of Kitron Green Initiatives while driving innovation within the organization.
